## Skills

- PROGRAMMING LANGUAGE JAVA JAVA SCRIPT
- FRONTEND FRAMWORK - REACT JS
- FRONTEND TECHNOLOGY HTML, CSS
- BACKEND TECHNOLOGY:-NODEJS, ExpressJs
- DATABASE – MONGODB

## Projects

- PASSWORD GENERATOR**  
A Password Generator project using JavaScript creates a tool that generates strong, random passwords based on user input, such as password length and character types (uppercase, lowercase, numbers, special characters). The application uses JavaScript to generate unique passwords, providing a simple and effective way to create secure login credentials.
- WEATHER APPLICATION**  
A Weather App project using HTML, CSS, and JavaScript creates a dynamic web application that fetches real-time weather data from APIs, displaying current conditions, forecasts, and other relevant information. The app typically features a user-friendly interface, location-based weather updates, and interactive elements, showcasing the integration of front-end technologies with external data sources.
- DSA Tracker Project**  
Technologies Used: React JS, JavaScript, HTML/CSS.  
Developed a DSA Tracker application using React JS to help users track their progress in Data Structures and Algorithms.
- Bring your own form**  
Worked on project that allow user to manage event by bringing their own forms -- focus on clean UI , simple workflows and real time form handling.  
Front-end and back-end.
